

Environmental policy

Freefoam Plastics (UK) is committed to the prevention of pollution and to continual improvement in environmental management and performance.

We shall achieve this by the implementation of an environmental management system which will include:

- Committing to comply with legal and other requirements.
- Applying sound environmental practices in our, on site, operations and activities.
- Employing best available and economic techniques for the measurement and control of emissions and wastes and for the optimal use of resources.
- Using the Management Review to agree and set environmental objectives and targets and programs.
- Training employees and all persons working on behalf of the organisation to ensure they are fully competent to control the activities for which they are responsible.
- Overall implementation of the policy is each employee's responsibility and is an integral part of every manager's job.
- Promoting this environmental policy to trading partners and seeking their active participation in achieving its objectives.
- Making information on our environmental performance publicly available, anticipating and responding to concerns regarding our activities and encouraging dialogue with interested parties.

Additionally Freefoam Plastics (UK):

- Optimises recycling and energy usage to ensure all waste and use of resources is kept to a practical minimum.
- Provides a framework for setting environment objectives and targets designed to enhance improvement.
- Promotes sustainability and energy conservation.

This documented Policy shall be, communicated and implemented (documented & maintained) to all persons working for or on behalf of the organisation and is available to the public.

Colin St. John

General Manager
